Becoming Mac Savvy

Answer the following questions in your Journal. If you have a computer at home or work, try to find the same information on those computers too, Mac or PC.

1. What version of the operating system is the computer using?
2. How much memory is on the computer (RAM)?
3. What is the processor speed and chip of the computer?
4. What is the Bus speed of the computer?
5. How many processors does the computer have?
6. What is the size of the level 2 cache?
7. What is the machine model?
8. How many slots for RAM does the computer have? How many are empty?
9. What is the Ethernet Address?
10. What is the IP Address?
11. What is the Broadcast Address?
12. What USB devices are hooked up to the computer?
13. What devices are hooked up to the bus?
14. What is in the PCI slot?
15. What are the last 5 entries into the Log?

For definitions of these terms, go to ArtSmart (http://ltccartsmart.blogspot.com/) and check under Friday, January 16, 2004.

Review the Panther Guide and become familiar with key commands you will frequently use (copy, paste, cut, new, open, zoom in, zoom out, save, save as, force quit, close, etc.)
